

GECC PER Project Community Curriculum Illustrations

Developed in partnership between

By: Chris Chandler, RD LD

These illustrations were created to fill the gap in high quality, flexible first-aid and medical images appropriate for the context of Sub-Saharan Africa. I would like to thank the Global Emergency Care Collaborative's administration, particularly Heather Hammerstedt MD MPH, for their patience and support as well as all of the ECP students and staff at Karoli Lwanga Nyakibale Hospital for posing for the images from which these illustrations were built. Please use these illustrations as you need (see license below) and share with others that may find them useful.
